## NHS 220ecv Forest Line

NHS 220ecv is intended for side-feeding (90° in relation to travel-direction) with crane. It is constructed of high-tensile steel, which ensures a modest weight - but long durability.

For all Forest Line woodchippers, there is a large selection of Discharge pipes, cranes and additional equipment, which customizes the individual solution.

For example, Autoturn Discharge pipe, which makes it easier to steer the chip-beam towards the trailer, or NHS crane console, which ensures an ultra-compact mounting of the crane.

The *ecv*-model is for external hydraulics (oil supply from tractor).
