NHS 220icv Forest Line

NHS 220icv is intended for side-feeding (90° in relation to direction of travel) with crane. It is constructed of high-tensile steel, which ensures a modest weight - but long durability.

For all Forest Line woodchippers, there is a large selection of Discharge pipes, cranes and additional equipment, which customizes the individual solution.

For example, Autoturn Discharge pipe, which makes it easier to steer the chip beam towards the trailer, or NHS crane console, which ensures an ultra-compact mounting of the crane.

The *icv*-model is with integrated hydraulics.
